

Blower Motors

Thermoplastic, injection molded blower motor wheel and flange ensures precision and consistent quality.

Brushless blower motor winding.

Dynamic balance test verifies weight balance at high and low speeds.

Features & Benefits

- Voltage tested
- Amp draw tested
- Durability tested on every new design
- Properly fitted and balanced wheel to reduce vibration, noise, and prevent premature failure
- Packaged with form fitting padding to prevent damage in transit
- Designed to meet/exceed OE fit, form and function

Blower Motor Kits

gpd Blower Motor Kits Include:

- Blower Motor with Wheel
- Resistor/Module
- Harness/Pigtail (if applicable)

62 gpd Blower Motor Kits cover the top 100 high failure rate applications.
