

2007–2013 Subaru Forester and 2008–2011 Subaru Impreza Piston Replacement Compressor: 6513347

gpd has identified and designed a solution for 2007–2013 Subaru Forester and 2008–2011 Subaru Impreza OE vane style compressors.

THE PROBLEM

The vane compressor for the applications above can experience problems when transitioning from winter to summer conditions, especially if the vehicle's A/C system has not been used. The blades of the vane compressor tend to get stuck in the guides. This leads to compressor failure because the compressor is unable to create pressure.

gpd SOLUTION

gpd has manufactured a compressor that can replace the OE style vane compressor for the applications above. gpd's compressor design, 6513347, has a few notable differences compared to the OE style. 6513347 is a piston replacement compressor. It is a direct bolt on, bolt off replacement and comes with a new universal bracket that is designed to work with both the piston replacement and the OE compressor.
