

2000–2006 Audi TT and Audi TT Quattro Blower Motor Resistor Options: 1712038 and 1712036

Sometimes vehicle components are updated in the process of introducing a new model. gpd offers two blower motor resistor options for the 2000–2006 Audi TT and Audi TT Quattro models listed below depending on whether the vehicle has automatic or manual A/C controls. These blower motor resistor options have different internal electronics and do not interchange.

How to identify which blower motor resistor option is correct?

- Determine if the vehicle has manual or automatic climate control (Refer to gpd Tech Tip #112 for a depiction of manual vs. automatic climate controls).
- Look under the passenger’s side of the vehicle where the blower motor is located, pointing downward toward the floor.
- The blower motor resistor will be located beside the blower motor, towards the kick panel.

1712038; Manual A/C;
Red Resistor Housing

Audi Applications:

- 2000–2006 Audi TT 1.8 L4
- 2000–2006 Audi TT Quattro 1.8 L4
- 2004–2006 Audi TT Quattro 3.2 V6

1712036; Automatic A/C;
Black Resistor Housing

Audi Applications:

- 2000–2006 Audi TT 1.8 L4
- 2000–2006 Audi TT Quattro 1.8 L4
- 2004–2006 Audi TT Quattro 3.2 V6
