

2005 Ford Excursion 6.0 V8 Diesel Engine Radiator Replacement Options: 2741C & 2887C

gpd offers two radiator replacement options for the 2005 Ford Excursion 6.0 V8 diesel engine model with key differences in fitting connections.

- Radiator 2741C is suited for 2005 Ford Excursion models with a 6.0 V8 diesel turbo engine with automatic transmission connections featuring a threaded connection fitting style. To identify this model, visually examine the vehicle for a large brass nut attached to the radiator tank where the transmission lines connect at the bottom of the radiator.
- Radiator 2887C is suited for 2005 Ford Excursion models with a 6.0 V8 diesel turbo engine with automatic transmission connections featuring a quick connect fitting style. To identify this model, visually examine the vehicle for a plastic case/holder over the transmission line connections at the bottom of the radiator.

2741C • Radiator
3/4" Transmission Oil Cooler
Threaded Fitting Style

2887C • Radiator
Quick Connect Transmission
Oil Cooler Fitting Style

gpd recommends the use of a transmission line quick disconnect tool when disconnecting the transmission lines on a radiator with quick connect style fittings.
