

# 2000–2007 Ford Focus Accumulator Options: 1411664 and 1411867

Due to model design changes, gpd offers two accumulator options for the 2000–2007 Ford Focus:

- 1411664 is a first-generation replacement accumulator designed with a 5/8 inch hose opening.
- 1411867 is a second-generation replacement accumulator designed with a 3/4 inch hose opening.

1411664  
First Generation Design

1411867  
Second Generation Design

Most 2000–2007 Ford Focus systems on the road today will feature the second-generation design (1411867). gpd recommends updating systems that feature the first-generation design (1411664) with the second-generation design at time of service along with the suction hose.
